Tejaswini Bhokare
(React Js/Vue/Angular/Node.js Developer)
tejaswini.kar@gmail.com
(904) 518 7084

PROFESSIONAL SUMMARY:

- Over **9+ years** of experience in developing web pages and user interfaces using **HTML5, DOM, CSS3, Bootstrap, JavaScript, jQuery, AngularJS, Vue.js, Reactjs Web pack, AJAX, JSON.**
- Experience in designing and developing internet/Intranet web applications using **HTML 5, JavaScript, Angular, CSS, and SCSS**, media queries which are responsive, testable, extensible, and reusable and meets desired architectural objectives.
- Expert in **Angular JS,** worked on **Angular JS** features like Two Way Binding, Custom Directives, Controllers, Filters, Services and Project Architecture, React JS features like Components, Lifecycle methods.
- Expert in **Vue JS,** worked on **Vue JS** features like Options API, Compositions API, slots, watchers, SFCs. Implemented an AI app with Vue.js using composition/options API, typescript, Vuetify, Nuxt.js.
- Well-experienced with **User Experience**, Usability, Visual Design, Users, Customers, Communication, Relationship, and Business Value.
- Experienced as a User Interface/Front End Developer in developing applications using **HTML/HTML5, CSS/ CSS3, JavaScript, AngularJS DOM, jQuery, LESS, Ajax and JSON.**
- Experience in all phases of SDLC like Requirement Analysis, Implementation and Maintenance, and extensive experience with **Agile** and **SCRUM**.
- Experience with **NPM**, **Bower, Gulp**, **Grunt** built task like Hibernate.
- Solid experience with Responsive Web Design (RWD).
- Rich experience with working on **React JS components**, **Forms**, **Events**, **Keys**, **Router**, **Animations**.
- Experience in working with React JS to handle browsers compatibility issues with browsers like IE, Firefox, Safari, Opera, and Chrome.
- Familiar with popular browsers development and debugging tools/plugins for IE tester, Chrome Inspector, **Firebug, Jasmine, Jest** and **Karma** testing framework.
- Strong experience in CSS3 preprocessors styling such as SASS and LESS.
- Experience in popular JavaScript frameworks such as **Angular.js, Node.js, jQuery, Express.js, Jasmine, and Jest.**
- Very good experience in Document Object Model (DOM). Deal with client-side applications using React JS and working knowledge on **Grunt** and **Gulp**.
- Expertise in analyzing the DOM Layout, Java Script functions, Cascading Styles across cross-browser using **Fire Bug**, Developer Tool Bar.
- Proficient in various version control systems **SVN**, **GitHub, Subversion**.

TECHNICAL SKILLS:

UI/Web Technologies	Bootstrap, JavaScript, Typescript, AJAX, JQuery, JSON, CSS2/3, HTML4/ 5, XHTML, XML, SASS, LESS.
Server Side / BackEnd	PHP (WordPress), Node js
Build Tools / Task Runners	Grunt, Gulp, Netlify, Webpack
JavaScript's / Unit Test Frameworks.	Vue Js, AngularJS, ReactJs, NodeJS, AngularJS, ExpressJS, Karma/Jasmine, BootstrapJS, Mocha/Chai, Nuxt.js, Next.js.
Development IDE's	Visual Studio, Notepad++, IntelliJ, Adobe Dreamweaver.
Web/App Servers	Apache Tomcat 7.0, HTTP Web Server, IIS
Browser	All (IE, Firefox, Opera, Chrome, Safari)
Database	SQL Server, Oracle, MySQL, MongoDB
UI/UX	Vuetify, Tailwindcss, Figma, React-bootstrap

EDUCATION:

- Bachelor of Engineering (Computer Science) from Cummins College of Engineering for Women in 2006.

PORTFOLIO:

- **https://tejaswinibhokare-github-io.vercel.app/**

PROFESSIONAL EXPERIENCE:

Curiouser.Ai, California, Remote   **July 2024-Present**
Role: Sr. Fullstack Engineer

Responsibilities:
- Developed user interface using HTML5, CSS3, Vuetify, Typescript, and Vue JS that meets accessibility and web browser standards for websites.
- Worked with CSS3 in designing templates for use in all pages on the website working with positioning, text, padding, border, margin, CSS background and div blocks.
- Developed user interface by using Vuetify, Figma for SPA development.
- Used Vue JS single file components for data manipulations and to display data in company standard format.
- Used Vue-Router to turn application into Single Page Application.
- Experienced in developing components also used Axios with Vuejs for making AJAX Calls.
- Maintained states in the stores and dispatched the actions using Pinia.
- Manipulated DOM, handled events and applied animation effects with Vue.js.
- Used Nuxt.js for Server-side rendering which optimized data loading tremendously. Used NuxtContent for displaying blogs from Medium.com of Curiouser account. Created md files to showcase all blogs using NuxtContent.
- Worked on Vue JS components, Forms, Events, Router, Animations, themes and Vuetify components.
- Implemented complete website **curiouser.ai** end to end using Vue.js, typescript, HTML5, CSS3.
- Implemented video carousel to display video of selected team members. Used vuetify component slide groups to display carousel by giving input as YouTube video id.
- Implemented modules into NodeJS to integrate designs and requirement.
- Worked closely with the Back-End team and design team to display data using the Custom Components, library Components, and layout.
- Developed API for using AWS Amplify to manage the servers, user registrations/login and run the code in the AWS.
- Implemented product dashboard to display generated conversations with Alice a reflective AI. This includes showing each conversation in vuetify card and adding delete, download, progress bar for each conversation. Used Flexbox for responsive layout.
- Implemented product chat interface this includes ChatGPT kind of interface, in which user asks questions to Alice and she gives responses to user. Used Vuetify textarea and other components.
- Used Git for version controlling and regularly pushed the code to GitHub.

Environment: HTML5, CSS3, Netlify, Nuxt, Vuetify, Typescript, Vue JS, Pinia, Restful API, Axios, AWS Amplify, Node JS, Python, JSON, JIRA, Git.

Cognizant Technology Solutions, India   **Feb 2016 – October 2017**
Role: Sr Associate
Responsibilities:

- Developed new user-facing features using React.js /Angular JS.

- Collaborated with UI designers and backend developers to implement user interface designs and features.
- Build reusable components and front-end libraries for future use
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Ensured that all the assigned deliverables are completed on time and with impeccable quality
- Provided guidance and supported other team members in accomplishing tasks
- Provided timely support in troubleshooting defects and providing resolutions, supported production deployment and project go-live tasks
- Actively participated in team meetings and collaborating with other team members to carry out project deliverables. Mentored junior developers on best practices in React development, reducing code review iterations and boosting team productivity.
- Used NPM to install all the required node modules and other Angular NPM modules.
- Extensively Worked with Angular CLI and created components, Services, pipes, Directives.

- Implemented complete banking application of Barclays end to end, focusing on user experience and responsive design, showcasing my commitment to creating intuitive interfaces. I was involved in complete SDLC right from creating POCs to successful delivery.
- Created different forms of Banking app including search functionality. Implemented admin section which maintains user registrations and users.
- Implemented login/register forms based on type of users and show navigation menu based on user type.
- Extensive experience in developing web pages quickly and effectively using jQuery, HTML5, CSS3, Responsive Web Design, Bootstrap and experience in making web pages cross browser compatible.
- Experienced in JavaScript and Typescript, also including DOM manipulation and the JavaScript object model
- Updated the application with popular React.js workflows.
- Develop front-end and UI development across multiple product sets
- Used newer specifications of ECMAScript in the application.
- Designed Responsive UI design using HTML5 and CSS3.

Environment: Typescript, Node.js, ReactJs, Angular js, Bootstrap Typescript, CI/CD, GitHub, JavaScript, HTML 5, CSS3, JSON, AJAX, REST service, jQuery, Jasmine, Karma, SVN, VS Code.

Client: Persistent Systems Ltd, India   **Nov 2012 - Jan 2016**
Role: Module Lead
Responsibilities:
- Re-engineered the existing legacy application into a web-based application using the latest web technologies.
- Developing two different mobile-based applications and managed in developing various web pages of the Mobile based application.
- Implemented carousel using bootstrap to display videos and on select it enlarges video and show details
- Implemented Facebook integration on details page to share the video link on Facebook. Integrated API to implement this.

- Involved in development of commonly used angular components across teams such as directives for grid, pagination, conditional validations, carousels, modals etc.
- Creating User Interfaces for applications using Angular, HTML5, SCSS, Twitter Bootstrap and JQuery.
- Responsible for making responsive web pages using **twitter bootstrap** and **media queries.**
- Responsible for requirement analysis, design and development of UI.
- Developed UI pages using modules and directives in Angular for calling the Rest API from Backend.
- Designed UI screens using CSS, Angular Framework and HTML5.
- Involved in User Interface (UI) and User Experience (UX) design using HTML 5, XHTML, CSS3 and JavaScript and used Table Less Design in CSS for positioning.
- Developed responsive designs using HTML5 and CSS3 for handheld devices.
- Involved in VIEW and CONTROLLER section of MVC pattern for CMS project, it includes HTML5, CSS3, JavaScript, JQuery and AJAX which were used for UI development.
- Responsible for designing elegant User Interface by coding in HTML5, CSS3, Bootstrap, ReactJS and Node.js to build SPA Single Page Application.
- Integrating ReactJS framework to scale and keep up the apps better while dealing with the huge amount of data.
- Developed Header and Footer of web app as a UI component in ReactJS.
- Created customizable components for the new website using ReactJS and React-Routes to create a single page web application.
- Developed various screens for the front end using ReactJS and used various predefined components from NPM (Node Package Manager).
- Responsible for ReactJS UI and architecture, building components library, including Table Grid and worked extensively on the ReactJS, React-Bootstrap, JSX, CSS2/3, SCSS, Media queries for responsiveness.
- Built dynamically generated dropdown lists using ES6 and ReactJS.
- Used Node.js to run Grunt tasks and build properly the project (compile, minify etc.)
- Implement modules into Node JS to integrate with designs and requirements.

Environment: JavaScript, HTML 5, AngularJS, CSS3, JSON, AJAX, DOM, Ajax, Gulp, Grunt, jQuery, Eclipse, Dreamweaver, Typescript, Node.js, ReactJS, Jenkins, Bootstrap Typescript, Jasmine, Mocha, Chai, GIT, VS Code

Client: Cybage Software Solutions, India   **April 2011- March 2012**
Role: Senior Software Engineer
Responsibilities:
- Worked as UI Full Stack Developer with proficiency in web technologies and web designing Tools.
- Hands-on experience in building cross browser compatibility applications using HTML, CSS.
- Developed GUI using JavaScript, Bootstrap, HTML/HTML5, DOM, XHTML, AJAX, CSS3, and jQuery as a part of current project.
- Responsible for creating efficient design and developing User Interaction screens using **HTML5, CSS3, JavaScript, jQuery, AJAX, and JSON.**

Environment: HTML5, CSS3, Vanilla JS, Gulp, JavaScript, JQuery2.x, Apache Tomcat 8.x, Jenkins, Agile

Client: Niche Software Solutions, India   **Feb 2010   to March 2011**
Role: Senior Software Engineer
Responsibilities:
- Involved in developing the UI pages using **HTML, CSS, JavaScript, jQuery.**

- Developed a dynamic dashboard with movable widgets using jQuery and vanilla JavaScript.

- Implemented a transaction system generating PDFs by extracting data from MySQL database, created API in PHP to get the data using HTTP methods.
- Implemented a comprehensive investor registration module, highlighting my experience in developing CRUD applications and ensuring user-friendly interfaces.
- Implemented CMS editor to create html templates using jQuery, JavaScript, html, CSS, PHP and MySQL. User can create their HTML design using this CMS editor and can send to million of their clients.
- Developed front end along with pages for user interactions; for the entire website using **HTML5, CSS3, JavaScript JSON, jQuery, and AJAX.**
- Used Selectors, Events, AJAX, jQuery and Dom Manipulation for updating content on DOM nodes.
- Well-experienced with **User Experience**, Usability, Visual Design, Users, Customers, Communication, Relationship, and Business Value.
- Built Web pages that are more user-interactive using **JavaScript**.
- Involved in localization and **internationalization** of web pages using **JSON, XSL, XML, and PHP.**
- Participated in meetings with the end-clients to develop layout, color scheme for the web page and implemented them with the help of **HTML5, CSS3 and JavaScript**.
- Converted data from database into **JSON or XML** format files and retrieve useful information using **AJAX** calls to display them on the browser.
- Involved in **AGILE** process, two-week Sprints, and daily Scrums to discuss the development of the application to deliver in time.

Environment: Html 5, CSS 3, AJAX, JSON, PHP, MySQL, XML, IIS

Client: WebworxIndia Pvt. Ltd, India   **Jan 2007 to Feb 2010**
Role: Senior Software Engineer
Responsibilities:
- Front-end web development using **HTML5, CSS3, SASS, PHP, MySQL, JavaScript and JQuery**.
- Used **ECMA**Script language with structured, dynamic, functional, and prototype-based features.
- Implemented client-side scripting using **JQuery and AJAX**.
- Designed and developed various Screens using **JavaScript, HTML, and CSS**.

- Built five e-commerce websites end to end, incorporating PayPal systems using PHP and MySQL, showcasing my ability to create seamless online shopping experiences. This includes displaying items, add to cart functionality, checkout functionality, return to website after checkout from PayPal, admin functionality to add items from admin module.

- Implemented RESTful APIs in PHP and integrated MySQL databases.

- Implemented site language translation features, demonstrating my understanding of internationalization and the importance of accessible web design.
- Implemented different markers in CMS editor like adding property marker by adding it in template it builds whole new website, search functionality marker, adding new videos feature etc.

- Worked on WordPress CMS editor and created custom themes.
